Established in 1959 to:
build & maintain human knowledge, skills & biological resources in support of horticulture worldwide
Provide – through meetings and publications – both context and ongoing support for professional decision making
Explore and explain the many contributions of horticulture to a healthy human environment
A society of individuals, organizations, and governmental agencies devoted to horticultural research, education, industry and human wellbeing
7200+ Individual Members in +140 countries
+150 Institutional Members
49 Country Members (on all continents)
Scientific Programme

- Up to 1994: 447 symposia
- 1994-2005: 332 symposia (30/year)
- 2006: Int’l Horticultural Congress, Korea
- International Horticulture Congress held once each 4 years
- IHC 2002 attracted 2,500 delegates from 89 countries
- IHC 2006 in Seoul
- IHC 2010 in Lisbon
- IHC 2014 in Brisbane
XXVIIIth International Horticultural Congress
Lisbon, Portugal
August 22-27, 2010

International Society for Horticultural Science
- 10 crop-related Sections
- 14 discipline-related Commissions
- 100+ Working Groups
- 30-40 International Symposia per year

International Society for Horticultural Science
Sections (crop-related)

- Medicinal and Aromatic Plants
- Nuts and Mediterranean Climate Fruits
- Ornamental Plants
- Pome and Stone Fruits
- Citrus
- Root and Tuber Crops
- Tropical and Subtropical Fruits
- Vegetables (Chair: Prof. Silvana Nicola; Vice-Chair: Dr. Wei Liu)
- Vine and Berry Fruits
- Banana and Plantain
Commissions (discipline-related)

- Biotechnology and Molecular Biology
- Economics and Management
- Education, Research Training and Consultancy
- Horticultural Engineering
- Irrigation and Plant Water Relations
- Landscape and Urban Horticulture
- Nomenclature and Cultivar Registration
- Fruits and Vegetables and Health
- Plant Genetic Resources
- Plant Protection
- Plant Substrates
- Protected Cultivation
- Quality and Post Harvest Horticulture
- Sustainability in Integr. & Organic Horticulture
Publications

- Each symposium published in Acta Horticulturae®
- All Acta posted at www.actahort.org
- 760+ Acta volumes online
- 40,000+ full text articles
- 200+ Library Subscriptions worldwide
- 17,500 page views per day!

SCRIPTA HORTICULTURAE

New ISHS publication series for special topics

Launched in 2005

ISSN 1813-9205

International Society for Horticultural Science
welcome to ishs

The ISHS, dating from 1864 and formally constituted in 1959, has more than 7000 members representing some 150 countries. It is the world’s leading independent organization of horticultural scientists and publisher of Acta Horticulturae, Chronica Horticulturae, and Scripta Horticulturae.

the aim of the ishs is...

...“to promote and to encourage research in all branches of horticulture and to facilitate cooperation of scientific activities and knowledge transfer on a global scale by means of its publications, events and scientific structure”. Membership is open to all interested horticultural researchers, students and institutions.
PubHort: crossroads of horticultural publications

PubHort is a service of the International Society for Horticultural Science as part of its mission to promote and encourage research in all branches of horticulture, and to efficiently transfer knowledge on a global scale. The PubHort platform aims to provide opportunities not only for ISHS publications but also for other important series of related societies and organizations. The ISHS and its partners welcome their members to use this valuable tool and invite others to share their commitment to our profession.

Acta Horticulturae
A series of scientific-technical publications, mainly devoted to the proceedings of the ISHS Eurohort and the ISHS International Horticultural Congresses covering the whole range of horticultural sciences. Since 1964 Acta Horticulturae has grown into one of the leading series in horticultural science with tens of thousands of researchers all over the world using this resource to stay in touch with advances in their profession. Acta Horticulturae volumes are available in both electronic format (ActaHort.org) and hardcopy as well as pay-per-view article downloads. Acta Horticulturae is indexed in all major databases including AGRICOLA and CABIAbstracts and is the flagship serial publication of the International Society for Horticultural Science.

Plant Breeding Reviews
Plant Breeding Reviews, edited by Jules Janick, is now published by John Wiley & Sons, Inc. The series of articles written by world authorities provides state-of-the-art reviews on plant breeding and genetics concerning horticultural crops and ornamentals. The series is indispensable for scientists, crop breeders, and business oriented in crop improvement and genetic resources. One or two volumes appear per year. All back issues are made available online by ISHS as a result of a special agreement with John Wiley & Sons, Inc. There is a five year delay for volumes to appear online in PubHort.

Horticultural Reviews
Horticultural Reviews is an annual review series edited by Jules Janick and now published by John Wiley & Sons, Inc. The series presents state-of-the-art reviews on topics in horticulture and the horticultural sciences covering both basic and applied research. One or two volumes appear per year. These review articles written by world authorities, provide the valuable function of collecting, comparing, and contrasting the primary journal literature in order to form an overview of the topic. This detailed analysis bridges the gap between the specialized researcher and the broader community of horticultural scientists and teachers. All back issues are made available online by ISHS as a result of a special agreement with John Wiley & Sons, Inc. There is a five year delay for volumes to appear online in PubHort.

Scripta Horticulturae
Scripta Horticulturae is a new series published by International Society for Horticultural Sciences. Scripta Horticulturae is devoted to specific horticultural issues such as position papers, crop or technology monographs and special workshops or conferences.

Date Palm Conferences
Proceedings of the First and Second International Conference on Date Palms, Al-Ain, United Arab Emirates, 1998 and 2001 respectively (courtesy of UAE University). Proceedings of the Third International Conference on Date Palms will be published in the series Acta Horticulturae.

PubHort a service of the ISHS
Horticulture Research International

Directory of hort-science Centers, Institutes and Agencies in 79 countries

Available to all at www.hridir.org
Governance and Management

- Board of Directors
- Executive Committee (Section and Commission Chairs)
- Council (Representatives of Country Members)
- Executive Director and Secretariat
ISHS Committee for Research Cooperation (CRC)

- Guiding the ISHS ‘outreach’ program
- Arose from 1998 World Conference on Horticultural Research (Rome-Italy)

Basic Strategy:
- Promote active participation from developing countries
- Cooperate with agencies & foundations already involved with research for development
ISHS Committee for Research Cooperation (CRC)

Objectives

- Identifying & engaging appropriate & productive partners
- More ISHS symposia in the South
- More professionals from the South attending ISHS symposia
- Gaining members from developing countries in all membership categories
Thank to the organizing committee of the III International Late Blight Conference
Thank to all participants
Logon to www.ishs.org and apply for ISHS membership today!

We wish you a successful meeting...
